ProsPay Connect ™

The ProsPay Connect Solution provides a quick and easy way to add payment capabilities to your Web site. Payment integration is simple and all transaction processing takes place on ProsPay servers alleviating the risk associated with payment acceptance.

Challenge

Marketing products online is one thing; selling them online is quite another. And making the transition from an informational Web site to an e-commerce Web site can be a big step without the right partner.
Issues of security, safeguarding identity information, fraud protection, compliance with federal and state regulations—all of these can make the transition a daunting task, especially for those merchants with limited technical capabilities and budgets.

Solution

Whether you are selling one product or maintain a large online catalog, our ProsPay Connect Solution can help you process payments quickly and reliably.
The Connect Solution helps ease the integration of payment integration and with ProsPay hosting the payment processing, we ensure that your customer's data is secure by accommodating the latest compliance standards.
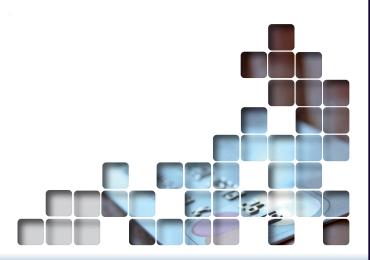

How It Works

Simply choose which payment functionality you would like offer and the level of development complexity you are willing to take on. Several options are available to accommodate nearly any level of developmentexpertise. Once integrated into your Web site, sensitive customer payment information is handled by the ProsPay Connect Solution. Transaction results are sent
automatically to you and your customers, allowing you to easily track and process orders online.
